

Mimecast Email Security

Shield against advanced threats using our cloud-based Secure Email Gateway, **powered by Mimecast**, fortified with AI capabilities.

Access world-class email security through the Email Security Cloud Gateway, a fully cloud-integrated solution. Easily manage complex environments, tailor policies to align with your needs, and enhance the security of your Microsoft 365 or Google Workspace with added protection.

Why should you consider enhancing your email security?

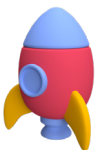

Industry-leading detection

Get the best protection against email-based threats with our AI-powered detection.

Email management

Control the complexity of your email environment with a security service that simplifies & consolidates your information in one place.

Advance your cyber resilience

Keep your data secure & emails flowing whilst informing & empowering your team.

Block **all email-based threats** with the next generation of security features

Granular controls

Customisable policies and configurations for you to control your email security all from one place.

Exceptional flexibility

Tailor your security to suit your needs with adaptability for cloud, on-premises, or hybrid — along with M365 & Google Workspace intergrations.

Advanced protection

Using AI threat-sharing interactions means you have advanced phishing protection along with enhanced attachment scanning and detection.

AI-based URL detection

Scanning destination URLs with URL Computer Vision, one of the most powerful AI tools available detects malicious files and activity.

Superior spam filtering

Mimecast provides an all-in-one cloud-based spam filtering service to stop spam, malware and viruses, minimising their disruption to your business.

“Mimecast offers unparalleled email security, providing comprehensive protection against advanced threats”
