

## Case Study

# Creating an independent IT environment for global training provider

**ARGYLL  
RUANE**

*Argyll Ruane are a global provider of Non-Destructive Testing (NDT) and coatings training, exams and NDT Consultancy Services.*

*With decades of experience, they deliver high-quality services to advance the industry by developing skilled professionals and supporting them and their employers throughout their careers.*

## The challenge

Following a management buy-out, Argyll Ruane faced the critical challenge of becoming fully independent from its parent company's IT infrastructure. They needed to transition all systems, data, and processes into a standalone environment in a quick and secure manner without business disruption.

Argyll Ruane were looking for more than just an IT provider. They needed a trusted partner who could understand their goals, assess the risks, and guide them through a complex IT migration while ensuring operational continuity.

## The solution

Central Technology (CT) partnered with Argyll Ruane to plan and execute a smooth migration. After in-depth consultations and an onsite review, we developed a tailored strategy, aligned timelines, and managed the entire process from data transfer to system setup.

Our project team worked closely with Argyll Ruane and their former parent's IT leads to ensure minimal disruption. Post-migration, CT continues to provide daily support, maintenance, and strategic advice.

## The outcomes

**Fully independent IT systems**

**Smooth, secure migration**

**Ongoing support and strategic partnership**

**Freedom to focus on business growth**
