CT Secure Cloud Backup with Immutability

Our Secure Cloud Backup provides immutable off-site backup through your existing Veeam Backup & Replication console - no additional configuration or hardware required. With clear, predictable pricing and no hidden charges, protecting your data is stress-free.

Key Service Highlights

01 **Simple per TB billing**
A clear, predictable pricing model with all Cloud Connect licensing included.

02 **Immutable cloud storage**
Backup data is protected with 14-day immutability and full support for daily and GFS retention

03 **UK-based data centres**
24/7 UK support, with dedicated infrastructure engineering teams.

04 **ISO27001 accredited**
Operates to recognised security standards with AES-256 encryption fully supported - with keys that you control.

05 **Streamlined restoration**
Self-service or fully supported restoration with simple execution.

06 **Transparent pricing**
No per-VM, ingress, or egress charges, eliminating unexpected costs.

Aligned to Industry Standards

Using the 3-2-1-1-0 framework, our backup design ensures enhanced resilience, reliable redundancy, and robust protection against data loss.
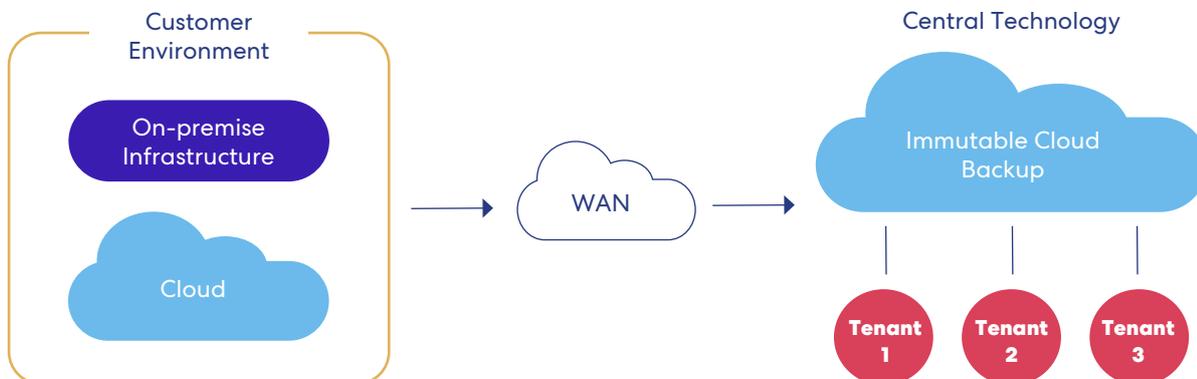

✓ Keep **three** different copies of your data.

✓ Use **two** different types of media.

✓ Keep **one** of those media off-site.

✓ Keep **one** media copy offline or air gapped.

✓ Test your backups, ensuring they have **0** errors.

Why CT for Cloud Backup?

● **Largest Veeam Cloud Connect provider** in EMEA.

● **Dedicated security and compliance teams** aligned to regulatory standards.

● **Comprehensive Veeam portfolio** including M365 Backup, licensing, and DRaaS.

● **Veeam Platinum Partner** and multi-year Backup Partner of the Year.

How does it work?

CT Secure Cloud Backup, powered by Veeam® Cloud Connect, **provides a secure offsite cloud repository, protecting your backups.** Beyond basic cloud storage, the service adds essential layers of resilience: including ransomware protection, adherence to 3-2-1-1-0 best practice & a cost-effective offsite copy for reliable recovery.
