

Velo Fleet Management

Effortless fleet management, made affordable.

Vehicle compliance management giving you sleepless nights? As part of our service portfolio, CT's Velo Fleet Management unifies your vehicle and driver data into one intuitive platform. Launched in 2024 and continually refined since, Velo is built around real operational needs, cutting manual admin and helping you stay in control.

Velo's Key Capabilities:

Manage all vehicle data in one place.

Stay ahead of every service, MOT and road-tax deadline.

Access key details like make, model, age, mileage and current driver.

Easily filter vehicles by branch, tool type, incidents and more.

View lifecycle details including lease and rental expiry dates.

Keep data current and protect your business with the Velo Driver App.
