

CT Backup

Backup-as-a-Service

More and more organizations are looking to BaaS to remove the trouble of protecting their data internally. CT Backup is our approach to backup-as-a-Service.

The backup and recovery of data is an important aspect of every IT department and is usually considered awkward and even unmanageable. People and their skills are the biggest expense and cause of problems when it comes to backup, putting the data of the business at risk and also hindering production time.

CT understand how important your data is, this allows us to provide an appropriate backup service. CT Backup is the service that has been designed to:

- Be tailor made to each organisation, as businesses come in all shapes and sizes
- Reduce costs of internal backup operations
- Protect and secure data by complying with regulations and working with industry leading partners
- Minimise disruption by reducing the time in which VM snapshots are open
